

WELDING SERVICES

Airco Welding Services (AWS) is a union specialty welding contractor. As such we are signatory to UA pipefitters and boilermakers International. These individuals are highly qualified, experienced, and skilled union supervision and craftsmen. In addition we employ the use of specialized state-of-the-art tools and equipment to support our customers' requirements.

AWS has a NQA-1 Quality Program second to none in the industry. We implement this program on all work performed across all projects including, nuclear and non-nuclear work scopes. We are capable of providing "turn-key" task managed project support including project planning, project management, supervision, craft, equipment, materials, NDE, pre/post heat treat, field machining, rigging, and more under one contract.

Emergent Response: AWS can also support emergent call out for resources to support unplanned work scopes and emergency situations.
